SUMMARY

I am looking for opportunities in Cloud-related roles. I have previously worked on technologies like VMware vSphere and Linux System Administration. I also have hands-on experience with Cloud tools like AWS, Azure, and Docker. I have completed my postgraduate studies in MCA and undergraduate studies in B.Sc.IT.

WORK EXPERIENCE

Cloud Support — Tata Consultancy Services

Dec 2021 – Jul 2023

- Managed compute, storage, and network resources for virtual machines, including VM provisioning, configuration, client software installation, system hardening, infrastructure monitoring, and recovery operations using VMware vSphere.
- Monitored and troubleshooted infrastructure performance issues and alerts using Zabbix and VMware dashboards to ensure system stability, availability, and operational efficiency.
- Provided Level 1 support for server and compute infrastructure by handling service requests (SR) and change requests (CR) in compliance with SLA targets and escalation procedures.
- Performed server firmware upgrades following maintenance best practices to optimize system performance and minimize downtime during scheduled maintenance windows.
- Generated daily operational reports, prepared root cause analysis (RCA) documentation for incidents, and maintained cloud infrastructure inventory records.

PROJECTS

Text-Based Emotion Detection

Developed a text-based emotion detection application using machine learning models trained on the GoEmotions dataset for multi-class emotion classification. Implemented data preprocessing and emotion mapping techniques to categorize 27 emotions into Ekman's basic emotion classes, improving model accuracy and consistency. Designed and developed the frontend interface to enable real-time emotion prediction from user-provided English text.

EDUCATION

Master of Computer Applications

2023 – 2025

VES Institute of Technology

Bachelor of Science in Information Technology

2018 – 2021

University of Mumbai

SKILLS

Programming Languages: Python, Java, C, C++.

Operating Systems: Windows, Linux.

Technologies/Frameworks: AWS, Azure, Jenkins, Docker, Spring, VMware vSphere, MySQL.
